

NO WAR ON NORTHERN SYRIA
Block, Disturb and Occupy Turkish Airlines!

In the last days from the 20th November until now the attacks against Rojava have massively increased. Rojava is at war – villages and cities, power stations, hospitals, health centers, schools, oil sites and gas stations are being bombed and destroyed by turkish drones, warplanes and artillery. Not just Rojava, but the whole region since years is confronted with the destructive and murderous turkish war-machinery. Why has Turkey been able to do so for years without anybody seriously saying anything about it? Because many profit from the the war in Kurdistan, the growing turkish weapon industry and the occupation of land. Like this Turkey has been able to invade parts of Northern Syria in the last years. In Northern Iraq/Southern Kurdistan the turkish army has been using chemical gas against the guerrilla in the tunnels and caves on a daily basis, without any state or official international institution caring about it. In Turkey a fascist regime is at power that uses torture and bombs against the own people. #WeSeeYourCrimes

Who are the ones that profit from the turkish war-machinery? Who are the ones that support and finance it internationally? Have a closer look on our researches and target map: <https://riseup4rojava.org/background-information/>

One of the carriers and profiteers of the war that Turkey is waging in the region is for sure Turkish Airlines. Turkish Airlines itself for a large part is a turkish state-company. It is operating all around the world and has strategical economic and political importance to Turkey itself. The management of turkish airlines of the last 20 years is also known for its close relationship to Erdogan himself.

Let us make them pay for the misery and destruction that they are causing! Come together and go to the closest airport in your region and block the turkish airline check-in's! Disturb there business and occupy there working places!

In several places these actions have already started and they show a direct impact on the turkish state, so with this simple action we can hurt them and make them pay.

Together we will Boycott Turkey, RiseUp4Rojava and Defend Kurdistan!
