

Call for participation in Actionday's: **X STOP THE USE OF CHEMICAL WEAPONS X**

Every day, the Turkish army attacks the free mountains of Kurdistan in northern Iraq with chemical weapons. However, the guerrillas in the war tunnels not only defy the enemy and his devious methods, they also manage to deal him heavy blows and even force him to retreat.

Despite the devastating effects of the earthquake with over 50,000 dead in Turkey and Syria, the attacks continue unabated. Fascism shows its true face when it moves its entire NATO army into position while the people under the rubble freeze to death or have to survive somehow in tents and in the open. But the spirit of resistance is unbroken. The people are beginning to organise themselves, which in turn brings the wrath of the AKP-MHP regime.

Let us be inspired by the resilience and ability of the Kurdish guerrillas to develop in the face of a technologically superior enemy. Let us be inspired by the spirit of resistance of all the progressive forces in Turkey who, despite the constant danger of ending up in the regime's prisons, have set up self-organised emergency structures instead of turning to the state.

We call to join the campaign of **Defend Kurdistan x Stop the Use of Chemical Weapons x** and participate in the **Days of Action from 16 to 19 March.**

We call to support the "gas masks for the guerrilla" campaign: widnet.org/gasmasken

We call to expose all allies and supporters of Turkish fascism.

Smash Turkish Fascism!
